

Woodworking Industry

We deliver clean air so companies operate safely, and families can be healthy together. It is the mission of Pleatco Filtration to be a best-in-class manufacturer and supplier of replacement and OEM filtration products.

Minimize Health Risks

Air filtration plays a major role in the manufacturing of wood products. As a vital and large industry, woodworking needs dust collection to minimize health risks that dust particles pose. It is also a good way to keep the working environment clean and safe.

Wood dust can cause irritation of the eyes and skin but can also lead to long-term health issues such as asthma and other respiratory conditions.

For media selection, we recommend using Cellulose media or Spunbond Polyester. However, it depends on the type of dust being dealt with.

Stocked Filters

We stock many standard OEM replacement filters that are able to ship within 48 hours!

Combustible Dust Hazards

Combustible Dust Hazards exist in woodworking applications; especially from fine dust particles.

Manufacturing Excellence

All Pleatco filters are built to OEM specifications or better. We use a wide range of materials to build innovative products, delivered fast and cost effectively.
