

# Blasting Industry

We deliver clean air so companies operate safely, and families can be healthy together. It is the mission of Pleatco Filtration to be a best-in-class manufacturer and supplier of replacement and OEM filtration products.

## Minimize Health Risks

Air filtration plays a major role in the processing of blasting. Blasting cleans, polishes, and roughens surfaces for many applications including painting prep, mold cleaning, infrastructural and architectural purposes and many more!

The dust and particulate that is generated from blasting needs to be managed and controlled to protect workers and the environment from health and safety risks.

For media selection, we recommend something that can handle abrasive dust particulate.

## Stocked Filters

We stock many standard OEM replacement filters that are able to ship within 48 hours!

## Types of Blasting

No matter the type of blasting that you encounter, we got the air filtration products to help!

## Manufacturing Excellence

All Pleatco filters are built to OEM specifications or better. We use a wide range of materials to build innovative products, delivered fast and cost effectively.
