

# Chemical Processing

We deliver clean air so companies operate safely, and families can be healthy together. It is the mission of Pleatco Filtration to be a best-in-class manufacturer and supplier of replacement and OEM filtration products.

## Improving Safety

Chemical processing plants are responsible for manufacturing certain chemicals such as dyes, pigments, gases, petrochemicals, coatings, adhesives and many more! It is important to ensure proper ventilation and dust collection to prevent explosions and improve air quality. Workers can be exposed to numerous pollutants in a chemical plant such as fumes and gases.

For media selection, we recommend using PTFE Spunbond for extremely fine particles or Polyphenylene Sulfide (PPS) when acids are present.

## Stocked Filters

We stock many standard OEM replacement filters that are able to ship within 48 hours!

## Combustible Dust Hazards

Combustible Dust Hazards exist in chemical processing plants as well associated health risks.

## Manufacturing Excellence

All Pleatco filters are built to OEM specifications or better. We use a wide range of materials to build innovative products, delivered fast and cost effectively.
